

CONSTANTIA ECOFLEX AHMEDABAD:

FIRST PLANT ON THE PLANET FOCUSING 100%

ON RECYCLABLE FLEXIBLE PACKAGING

Constania Flexibles had the vision to develop new environmentally friendly flexibles packaging that meets the demands of the modern world. In 2018 the company succeeded in its endeavors and launched **Ecolutions** – a 100% recyclable sustainable product line. Part of the innovative Ecolutions family is **EcoLam**, a whole family of monopolymer laminates based on PE which come in different moisture and oxygen barrier grades:

EcoLam

good barrier properties:

- dry pet food
- laundry products including powders
- tabs and capsules

EcoLamPlus

high barrier properties:

- meat
- cheese &
- dairy products in pouches

EcoLamHighPlus

excellent barrier properties:

- salad dressings
- coffee beans

The products are lightweight, have a mono-material structure and a carbon footprint that is approximately 32 % lower than comparable products. The products' recyclability is certified by Indian and European institutions.

EcoLam will be produced in the new plant in India: **Constania Ecoflex Ahmedabad** equipped with the state-of-the-art technology meeting all requirements of the new generations of flexible packaging. We are proud that Constania Ecoflex Ahmedabad is fully operational today and can serve customers from all over the world.

„As the world's third largest flexible packaging producer, we know about our responsibility towards the environment as well as the requests of the end consumers. Thus, our goal is to drive a change in the industry for more sustainable packaging solutions. With Constania Ecoflex Ahmedabad we are shaping the way not only for Constania Flexibles, but for the whole flexible packaging industry.”

Alexander Baumgartner

CEO Constania Flexibles
