

CONSTANTIA ECOFLEX AHMEDABAD: FIRST PLANT ON THE PLANET FOCUSING 100% ON RECYCLABLE FLEXIBLE PACKAGING

Finding sustainable flexible packaging that meets the demands of the modern world was not easy. In 2018 the company launched **Ecolutions** – a 100% recyclable sustainable product line. Part of the innovative Ecolutions family is **EcoLam** which comes in different moisture and oxygen barrier grades:

EcoLam

EcoLamPlus

EcoLamHighPlus

The products are lightweight, have a mono-material structure and have a carbon footprint that is approximately 32 % lower than comparable products. EcoLam product family in general has great advantages for **customers, consumers & the environment.**

EcoLam will be produced in the new plant in India:
Constantia Ecoflex Ahmedabad.

Ecoflex is equipped with **state-of-art equipment technology** ensuring that the products will be of **high quality** and meet all the requirements of the new generations of flexible packaging.

Constantia Ecoflex Ahmedabad became operational in September 2019, the official inauguration ceremony of the plant will take place in November 2019.
